

Sound of notes

You'll find precious notes in your space
It may be the hum of the computer
The clang of pots in the sink
Or the whirl of the dishwasher
Just listen and you'll hear the notes

Nature itself plays its own note
One example is the wind
The sudden gust
After a gentle breeze
And let's not forget about water
It too has its own to contribute
The soft patter of the rain
The thunder of a waterfall
Notes are everywhere in the big and the
small

All you have to do is just take time and listen
And you'll hear the notes playing
Their very own tune
